BACKGROUND

A long term training course

Diversity in Europe is a fact. As living in an ever changing culture, we continue meeting new situations that are connected with inclusion, diversity, different cultures and beliefs; and in some places arising radicalisation, nationalism, xenophobias and biases.

We as Europeans can be a leading example how to truly live our common values such as tolerance, freedom of speech and inclusion to achieve cooperation and active participation of individuals in our society. Through educating our societies, especially young people, we work towards more inclusive, understanding, cooperative and prosperous society of Europe and take preventive actions towards possible incidents.

The project “Ubuntu” aims to educate and support youth workers, youth trainers and educators on how to use outdoors for social inclusion and education in their youth work.

OBJECTIVES

What are the goals?

- To bring together 30 youth workers, youth trainers and educators from 12 European countries
- To acquire and improve competences for using outdoors as a method for social inclusion in youth work
- To create minimum of 20 local activities in each partner community focused on social inclusion and non-formal learning
- To create a project video with educational and awareness building purposes towards outdoors & social inclusion
- To have at least two publications about the project and related topics to reach wider audience.

THE PROGRAM

Four phases to complete

The project consists of 4 phases - preparation, training course (TC), implementation of local activities in each partner country and evaluation seminar.

The TC has three main parts: (1) a 5-day guided training to acquire and develop necessary competences, skills and behaviours for using outdoors as a method for social inclusion, (2) challenge part by planning and delivering program to youth in the Netherlands and (3) the evaluation of learning & planning of the local activities part.

Between TC and seminar, participants implement local activities in each partner country by using their new competences and methods acquired during TC.

In the evaluation seminar the participants both finalize their learning by creating their own individualised outdoor method and by sharing their results.

JONGEREN VOOR UITWISSELING EN BEGRIP (JUB)

ORGANIZER

JUB is a youth organization, founded in 2011, aiming to promote peace, understanding and co-operation between young people in the world. We aim to realize local and international youth activities, to promote tolerance between young people from different cultures and countries. Further, we hope to encourage active involvement in society, without any distinction because of race, social status, educational level or any other 'disadvantage'.

We work in a spirit of respect for human rights and we highly value sustainable development. Our projects are carried out by trained professionals, mostly based on non-formal education methods. It means we make use of several techniques, like brainstorming, discussions, presentations, role plays, simulations and expert inputs.

The proverb 'learning by doing' is most suitable here. In short, we create a space for young people to develop themselves.
